

## Computer Display Quick Set-up Guide

1. Use the Windows logo key  +P command for laptop display options. The Windows icon is located on the keyboard to the left of spacebar.

2. Select how you would like your desktop screen to be displayed:

**Computer Only** - Shows your desktop only on your computer screen.

**Duplicate** - Shows your desktop on both your computer screen and a second screen.

**Extend** - Extends your desktop from your computer screen to a second screen for a panoramic view.

**Projector Only** - Shows your desktop only on a second screen.
